My life is like my weaving...

I have many different strips to create the picture, each strip is representing my life. Then I come through with the weave and each time I come up I think of the future in front of me. Each time I go under, I think of the challenges ahead. I only put good energy into my weavings because I am absolutely in love with how they make me feel. I am weaving two or three of my images that I have taken and creating a new version of itself. I get excited about the paper I use as I am a very tactile person.
