Sculpture show focuses on charity, visual purity

New hope for rare children's play: The Children's Play Foundation is offering hope for children with rare diseases by creating play spaces that are appropriate to their needs. The foundation's goal is to provide a safe and stimulating environment that encourages play and physical activity. The foundation has received support from various organizations and individuals who believe in the importance of play in a child's development. Through the support of these organizations and individuals, the foundation is able to create play spaces that are tailored to the specific needs of each child. The foundation is continually seeking new ways to expand its reach and bring joy to more children.
